

YOUR gift to the Annual Fund made an incredible difference for HWS students.

Your impact made Hobart and William Smith Colleges accessible for students and expanded opportunities for their career and cultural enrichment.

The next time you toss a pebble in Seneca Lake, watch the ripples expand outward. Your gift made waves felt throughout the world.

These three HWS students show the tangible good that you provide and put a face to your investment.

YOUR IMPACT!

FORBES MAGAZINE NAMED HWS AN EXCEPTIONAL RETURN ON INVESTMENT

HWS RATED TOP SCHOOL FOR OUTCOMES BY FORBES GRATEFUL GRADS

MONEY MAGAZINE NAMED HWS AMONG 50 BEST LIBERAL ARTS COLLEGES

HWS RECOGNIZED AS TOP PRODUCING INSTITUTION FOR FULBRIGHT STUDENTS IN THE U.S.

The future YOU create.

The next mobile app you download may be developed by an HWS mathematician. The next collection you appreciate in a museum may have been curated by an HWS art historian. The next Upstate New York apple you bite into may be a variety produced or protected by an HWS scientist. The future leaders of our country may be the products of HWS global engagement.

Thank YOU

Thank you for your support of Hobart and William Smith Colleges.

We are grateful for the impact you have made on the lives of students—from study abroad experiences and scholarship aid to internship and research opportunities.

REPORT

YOU support the world's next global citizens.

THANKS TO YOUR GIFT HWS IS
1st
IN THE NATION FOR GLOBAL EDUCATION

Mobile application development takes on new meaning in study abroad opportunity.

When investigating study abroad options through the HWS Center for Global Education, Emily Bak prioritized her studies in computer science as well as opportunities for cross-cultural exchange.

At the Edinburgh program in Scotland, she had access to a wide range of course offerings and travel opportunities through the countryside of the United Kingdom and other destinations across Europe.

Emily's schedule included courses in mobile application development, web technologies, web design, software engineering technologies and a field-intensive class in Scottish culture.

"HWS has been extremely helpful with giving me opportunities, so when I brought up the idea of wanting to go abroad to my advisers, they said that despite my big course load they would help me make it work."

Mathematics

STUDY ABROAD:

Edinburgh Napier University in Scotland

IMPACT:

The Center for Global Education provides HWS students with a stipend for field trip expenses.

YOU shape the future with career internships.

THANKS TO YOUR GIFT
80
PERCENT OF HWS STUDENTS PARTICIPATE IN INTERNSHIPS

Safeguarding New York's production of fruits and vegetables through research.

Last summer at Cornell AgriTech in Geneva, biology major Alvin Randall helped discover the location on an apple's chromosome of any natural resistance to fire blight. In apple-producing regions like Upstate New York, fire blight can decimate an entire crop of apples.

Relying on his previous course and lab work at HWS, Alvin had a strong foundation in analyzing collected data and understanding protein nomenclature. The results of his research will help growers select apple varieties that can stand up to the bacteria that causes fire blight.

Alvin's research opportunity at Cornell's School of Integrative Plant Science was made possible through the Salisbury Center. "The team made me feel really welcomed and created a great environment that encouraged me to ask questions and learn new techniques."

92
PERCENT OF HWS STUDENTS RECEIVE FINANCIAL AID

Knowing the ropes leads to victory on the water and in the classroom.

An active member of the HWS sailing team, Bailey Carter was named Middle Atlantic Intercollegiate Sailing Association (MAISA) Women's Sailor of the Year, and named to the All-MAISA Women's Skippers First Team for three consecutive years.

She is employed as a Study Table Mentor for the Center for Teaching and Learning and interned at Pace Gallery in New York last summer.

As a recipient of the Pauline A Sammis '54 Annual Fund Scholarship, Bailey was able to tap into opportunities that would have been otherwise inaccessible. "I have had the most wonderful experience here at the Colleges. I am so grateful for your aid in helping me to complete my undergraduate degree."

Following graduation, Bailey hopes to pursue a master's degree in art history.
