Dear %%FIRST_NAME%%,

The real work in rowing often falls outside of practice hours. We learned this in our time on campus, and it keeps us motivated as we experience the longest off-season of our careers. While we are off the water, construction continues on our new boathouse, and this fall we've [launched a crowdfunding campaign](#) to raise \$10,000 to support the outfitting of the new boathouse.

As a rower, I find it very helpful to be able to perform all of my workouts in one specific place on campus, the boathouse. Having access to equipment that can be used in many ways—I ke dumbbells, pull-up bars, squat racks, weight benches, and barbells—is really valuable. Since November 2019 we have anticipated returning to a facility that is designed and outfitted to allow us to reach our highest potential. **You [can help MIT Crew acquire this equipment by supporting the crowdfunding campaign](#).**

Our teams count on the strength of our community, both in season and out, to [help us achieve our goals](#). We hope you'll help MIT Crew during this off season

Thanks, and Go Tech!
